

CAPABILITY STATEMENT

Noble Shield Safety Group

Construction safety leadership, project support, and workforce training built for field execution.

COMPANY OVERVIEW

Noble Shield Safety Group (NSSG) supports contractors and project teams with practical safety management, field observations, documentation, workforce engagement, and training coordination. Based in the Phoenix metropolitan area, NSSG is structured to support work in Arizona and project opportunities beyond the state.

CORE VALUE

NSSG connects written expectations to daily field decisions through direct communication, disciplined documentation, respectful coaching, and accountable follow-through.

Safety service capabilities

Safety Management On-site leadership, contractor coordination, observations, pre-task planning support, and follow-through.	Audits & Inspections Documented field reviews, corrective-action tracking, recurring-trend identification, and practical recommendations.
Safety Staffing Project-based safety managers and coordinators aligned to operational needs and coverage schedules.	Programs & Documentation Site plans, written programs, logs, forms, toolbox talks, and systems designed for field use.
Incident Prevention Hazard recognition, coaching, trend review, corrective-action planning, and prevention-focused follow-up.	Training Coordination Workforce needs assessment, course planning, and access to appropriately qualified instruction.

Project environments

NSSG is equipped to support commercial construction, industrial and manufacturing work, contractor-intensive projects, facility expansion and startup activity, logistics and warehousing, and electrical and mechanical trades. Engagements are scoped to the project, workforce, schedule, and operational risk.

Course access and practical learning support

OSHA Outreach	Hazard Control	Emergency & Specialized
OSHA 10-Hour Construction OSHA 30-Hour Construction	PPE Fall Protection Lockout/Tagout MEWP & Mobile Lifts	Confined Space NFPA 70E Electrical Safety CPR/AED access 40-Hour HAZWOPER access

Course availability, delivery requirements, completion documentation, and credentials vary by topic. NSSG delivers within its qualifications and coordinates appropriately authorized or recognized providers when required. Employers remain responsible for site-specific orientation, task qualification, and program requirements.

HOW ENGAGEMENTS BEGIN

1. Define the need Project location, work scope, schedule, workforce size, hazards, and expected support.	2. Confirm the approach NSSG aligns coverage, deliverables, training format, responsibilities, and timing.	3. Mobilize with clarity A written scope confirms the work before service or training begins.
---	--	---

WHY NSSG

Field-driven Recommendations are built for the work, not just the binder.	Clear documentation Findings, follow-up, and records are organized for accountability.	Workforce-focused Communication respects the craft while holding the line on standards.
